ABOUT US

CimpleO is a multi-award-winning production studio that goes beyond versatility and flexibility. By that, we mean that we can take on any problem or project — web development, IoT development, IT strategy — you name it and we can deliver it to you. Since 2012, our company has been nurturing projects, showcasing our technical expertise, and applying our skills to countless projects.

We are focused. We are builders. We aim to serve. And we can help you achieve your goals.

We're focused on meeting client expectations with top technical expertise that consistently delivers innovative and high-quality technology solutions.

We build our business relationships based on mutual respect and trust, a deep commitment to the highest service quality, technical excellence, talented engineers and a culture of innovation.

We serve enterprise clients, startups, entrepreneurs, artists and many others.
Our team of creative technologists are dedicated to providing exceptional solutions for our clients around the world.

We develop custom software, complex web services, desktop applications, client-server systems, elegant web and mobile apps as well as IoT solutions that are made to scale. Fast, stable, and solid backbone for any application.

We would like to discuss the way we could bring you best experience and reduce future maintenance bills.

You've found the team that is able to solve your problems, even the most difficult ones.

You'll be amazed.
